

New Product Announcement

January 2020

Model 6300SP

The **Model 6300SP** is our newest generation of rugged, temperature-controlled impulse sealers intended for use in laboratory and production environments requiring process validation and strict seal parameter control. The 6300SP offers an affordable sealing solution for virtually all bag or pouch materials, with the added features of recipes and dual-heat configurations.

Features/Improvements

- **Temperature Controlled**
 - Process control and validation
- **High Resolution Color-Enhanced Display**
 - Simple and intuitive set-up and operation
- **Recipe and Password Protection**
 - Up to 10 recipes settings (standard)
 - Multi-level password protection to parameter/alarm settings
- **Data Acquisition Ready**
 - Collect and download seal data history for analysis and trending
- **Multiple Seal Lengths**
 - Available in 15, 20, 25 or 30-inch seal lengths
- **Available in Upper or Dual (Upper & Lower) Seal Bar Heating**
- **Improved Safety and Reliability**
 - Dual, independent jaw obstruction sensing and alarm.
 - DC Control Circuit.
 - Heavy duty actuator cylinders and seal bar construction.
 - Display maintains power with E-Stop engaged.
- **Detachable Power and Foot Pedal Cords**
- **Polished Stainless-Steel Case and Product Tray**
