

## New Product Announcement

### January 2020

# 675 smartVAC2

The **Model 675 SmartVAC2** is designed for general purpose sealing applications where reliability and flexibility are paramount to your operation. This time-controlled sealer offers an affordable sealing solution for a multitude of applications. The impulse heating technology employed in the Model 675 SmartVAC2 allows for sealing of virtually all bag or pouch materials, with the added features of vacuum and gas purging if required.

### Features/Improvements
