

Model 60

Industrial Feed-Through Sealer

This pneumatic impulse heat sealer is custom-crafted for heavy-duty applications where large product sealing, or continuous product feed-through is necessary. Can be integrated as part of conveyor fed applications where sealing at both ends of the product are desired.

Performance

The Model 60 feed-through sealer is designed for reliable performance- both structurally and electronically. Its custom-crafted design utilizes an aluminum structure that is rugged yet lightweight and is designed for oversized and heavy-duty applications. The welded rectangular frame provides the structural stability necessary for scaling the sealer for products ranging from 40 inches to 120 inches wide, with up to 1 inch seal width. Wide opening seal jaws allow products to be fed from the front or the back of the machine and passed between the sealing jaws for uninterrupted flow. This rugged and versatile machine allows for easy two-handed operation, with simple easy-to-read dials and several built-in features to provide optimum operator safety. This unit can also be adapted to an automatic conveyor system, if needed.

Customer Service

Our dedicated sales and technical support teams are knowledgeable and ready to assist you when you call about your application. We work to set the industry standard for responsiveness and service to both existing and new customers.

Built-to-Last Reliability

Accu-Seal machines are designed and built with the highest quality components and manufacturing techniques to ensure unmatched product quality and many years of reliable, trouble-free service. Accu-Seal machines are all designed for easy installation, operation, and maintenance.

90-Day Limited Warranty

We are confident with the quality and reliability of our products and offer a 90-Day Limited Warranty. For further details please contact the Accu-Seal sales department. Accu-Seal machines are designed and manufactured with pride in the USA.
