

Model 50

Plastic Tube Sealer

Perfect for small batch runs or start-up operations. Easy, safe, and economical to operate, with heat and cool timers to ensure repeatable seal performance time after time.

Performance

The Accu-Seal pneumatic plastic tube sealer is the economical answer for sealing plastic or plastic lined tubes, and is ideal for use in medical, cosmetic, or scientific laboratory environments. This unit makes sealing plastic tubes easy. Fast and reliable, this machine seals one rack of tubes in the time it takes to prepare a second rack.

A set of two standard size racks are included with each machine. We recommend you send us your sample tubes in order to correctly size and build your racks. An external air supply is required to run this pneumatic sealer.

Customer Service

Our dedicated sales and technical support teams are knowledgeable and ready to assist you when you call about your application. We work to set the industry standard for responsiveness and service to both existing and new customers.

Built-to-Last Reliability

Accu-Seal machines are designed and built with the highest quality components and manufacturing techniques to ensure unmatched product quality and many years of reliable, trouble-free service. Accu-Seal machines are all designed for easy installation, operation and maintenance.

Two-Year Limited Warranty

We are confident with the quality and reliability of our products and offer a Two-Year Limited Warranty for most Accu-Seal machines. For further details please contact the Accu-Seal sales department. Accu-Seal machines are designed and manufactured with pride in the USA.
